Mobile Bay National Estuary Program  
ATTN: Jason Kudulis, Director  
118 North Royal Street, Suite 601  
Mobile, Alabama 36602

**RE: MBNEP's Lillian Recreation Park Low Impact Development Project**

Dear Mr. Kudulis,

This letter is to express the support of the Baldwin County Commission and its Environmental Advisory Committee (EAC) for the Mobile Bay National Estuary Program's Lillian Recreation Park Low Impact Development Project. The project is partially funded through the Alabama Department of Environmental Management's (ADEM) Clean Water Act Section 319(h) Alabama Coastal Nonpoint Pollution Control Program and the Gulf of Mexico Energy Security Act (GOMESA), administered by the Alabama Department of Conservation and Natural Resources.

This project will implement low impact development (LID) practices that are technically sound, environmentally protective, and economically practical. Using a watershed- and ecosystem-based approach, the project aims to protect and improve water quality by reducing pollutants addressed under the CWA Section 319(h) Nonpoint Source Program, with particular focus on pathogens. Project components will include the installation of permeable pavers, bioretention areas, bioswales, and other stormwater management features that will help protect and enhance the water quality of Perdido Bay.

The County's Environmental Advisory Committee (EAC), with support from County staff including Natural Resource Planners, will serve as the project's stakeholder and community outreach group. During the committee's monthly meetings, members will receive project updates, review progress, and provide input as needed.

Baldwin County looks forward to partnering on this project and continuing its commitment to being responsible stewards of the County's valuable natural resources.

If you have any questions or need additional information, please contact Ashley Campbell, Natural Resource Planner, at 251-423-3632.

Sincerely,

JAMES E. BALL, Chairman  
Baldwin County Commission
