Agency Comments

USACE, James Buckelew: Staff reached out but received no comments.

ADEM, Scott Brown: Staff reached out but received no comments.

Natural Resource Planner, Ashley Campbell: We were not able to access the rezoning site for an inspection. There does not appear to be access that is owned by the applicant.

Subdivisions, Fabia Waters: A preliminary plat will be required for review following the approval of the proposed rezoning application.

Civil Engineer, Tyler Austin: No development proposed at this time. Any future proposal will require drainage and construction plan review by Baldwin County Planning & Zoning Department. No existing access to this parcel currently exists. Any future access will require approved permit from Baldwin County Planning & Zoning Department. An easement also appears to bisect this parcel.

Staff Analysis and Findings

The criteria for reviewing zoning amendments are outlined in Section 19.6 of the Baldwin County Zoning Ordinance. Staff carefully considered all of these factors during the evaluation of the application.

(a) Degree of compatibility of the proposed rezoning with existing and allowable land uses in the vicinity.

The subject property consists of approximately 414 +/- acres and is currently zoned RA (Rural Agriculture). A rezoning request has been submitted to change the designation to RSF-3 (Residential Single Family) to allow for a single family subdivision. The surrounding area includes a mix of residential and vacant land use, with adjacent parcels zoned RA, RSF-2 and RSF-3 zoned parcels. The majority of these parcels are at least RSF-2 size (15,000 sqft) or greater. The parcels to the east that are in the City of Spanish Fort are zoned Residential Single Family District; R-1 that allows 20,000 sq ft. lots and R-2 that allows 15,000 sq ft lots.

(b) Degree of conformity of the proposed rezoning to the Master Plan.

The Florida Department of Transportation (FLDOT) has identified the subject property and surrounding area as having Ideal Conservation Development Potential, Conservation Development Potential and Moderate Development Density. The Conservation Development land patterns supports minimal development, with an emphasis on environmental conservation. The Moderate Development Density supports home types from large to medium sized lot for single family (RSF-1 and RSF-2).

(c) Proximity of the proposed rezoning to existing transportation network and utility infrastructure.

The subject properties are located within ½ mile of a Collector Road but there is no current access from the subject properties to any public roads. There are some nearby subdivisions which has utility infrastructure but would need to be extended and maybe upgraded for the development of the subject properties.

(d) Timing of the request and development trends in the area.

The subject property and surrounding areas are evolving toward low- to mid-density residential uses. To the south of the subject properties, there are commercial and high-density residential developments near the intersection of US Hwy 31 and Jimmy Faulkner Drive.

(e) Impacts to environmental conditions of the vicinity or the historic resources of the County.

As mentioned earlier, the development potential for at least half the property is as some type of conservation development, with an emphasis on environmental conservation and protection. While potential wetlands are shown on the Locator Map, a wetland delineation would be required to determine if the site can be reasonably developed without impacting jurisdictional wetlands or contributing to a net loss of flood capacity. Also, the property is not within the Historic District and should have no effect on the historic or cultural resources of the County.

(f) Impacts to the health, safety and welfare of the County and the vicinity.

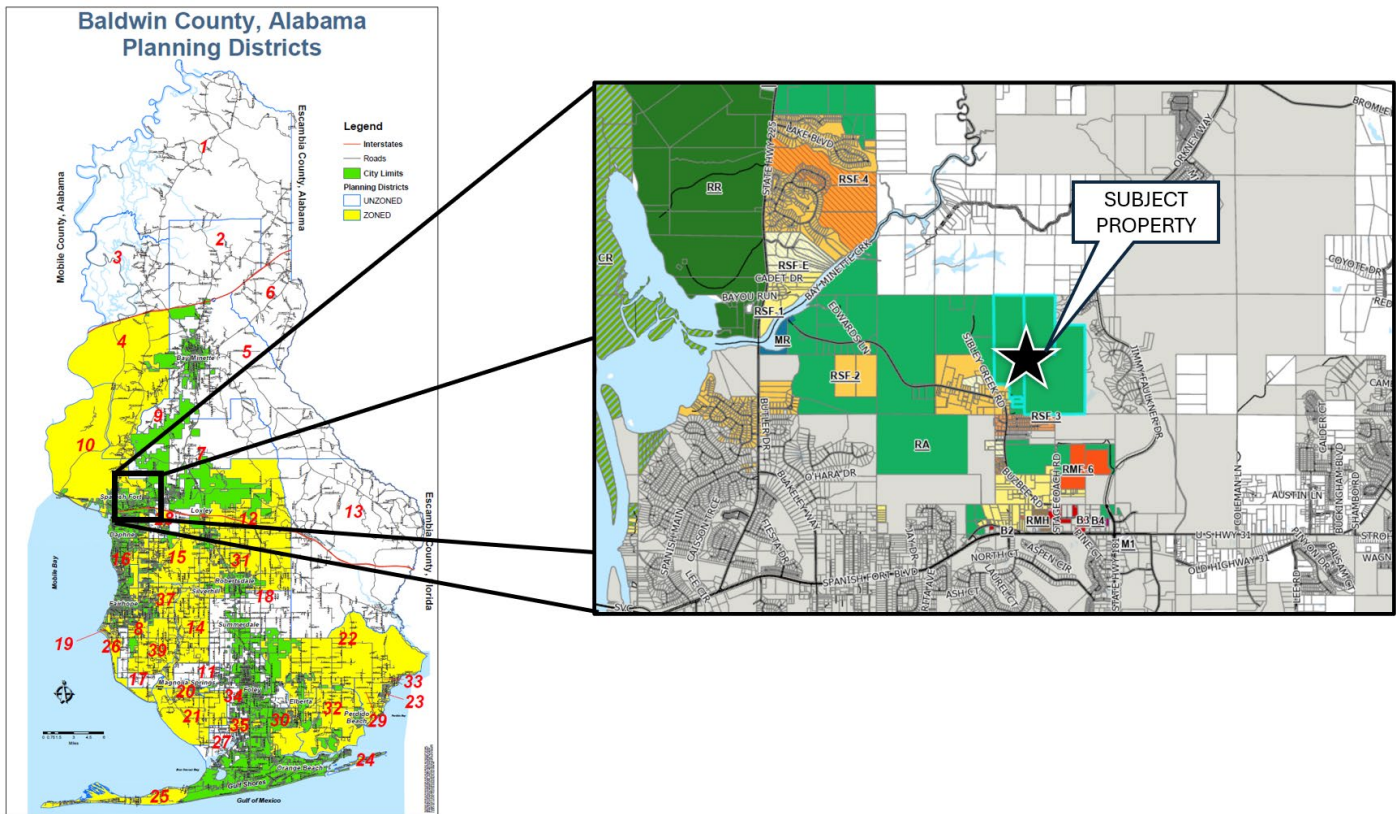

The proposed request should have no impacts to the health, safety and welfare of the property or surrounding properties.

Staff Comments and Recommendation

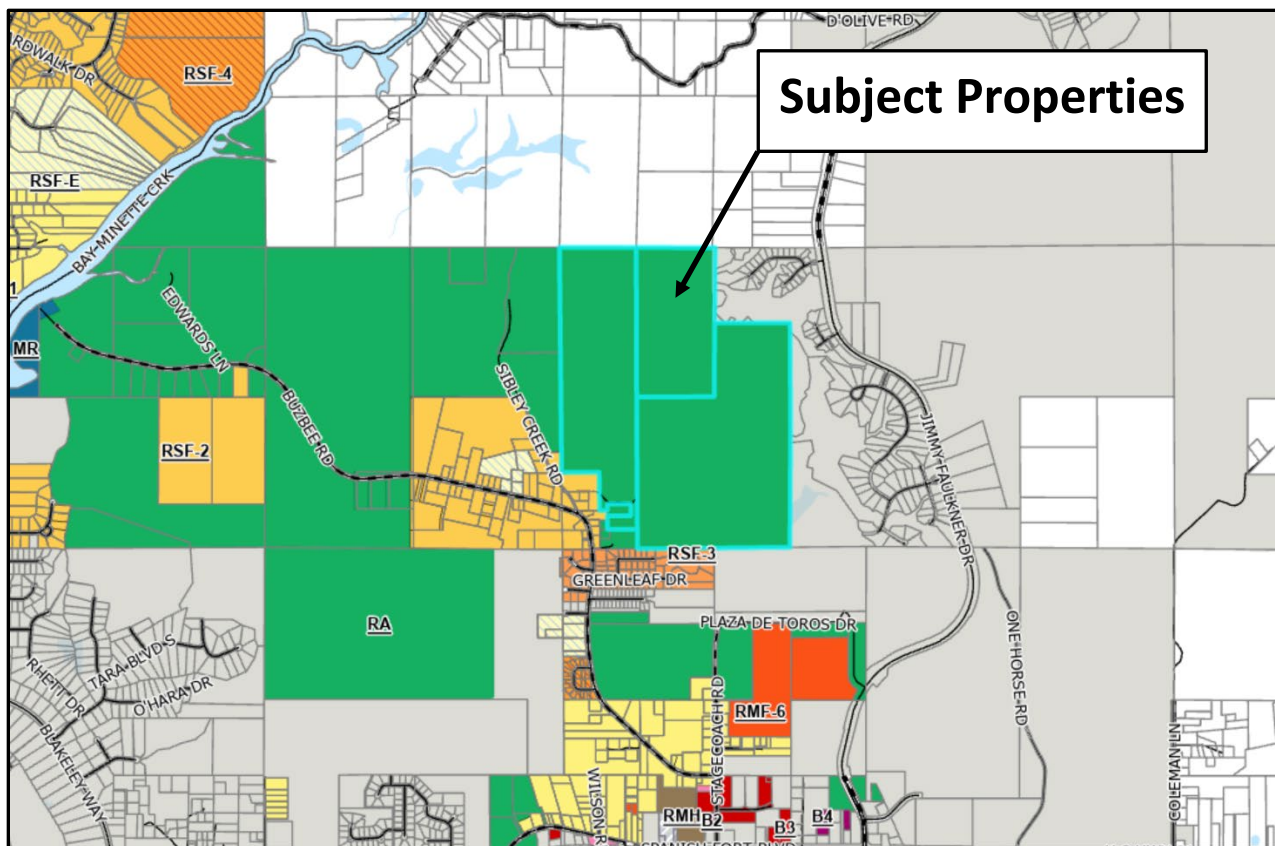

Upon review of the *Factors for Reviewing Proposed Zoning Map Amendments* specified within Section 19.6 of the Baldwin County Zoning Ordinance and themes of the Baldwin County Master Plan, staff has determined that the requested Zoning Map Amendment would be somewhat consistent with the factors specified within the Baldwin County Zoning Ordinance and is not consistent with the Baldwin County Master Plan Future Land Use Map.

The requested Zoning Map Amendment was also evaluated using the Smart Growth Scorecard (attached) which somewhat supports the request.
