

## ADECA ACTIVITY PROFILE SUMMARY

### Local Government Recovery Infrastructure Program

#### Program Summary

The Local Government Recovery Infrastructure Program (LGRIP) will provide CDBG-DR funding to municipalities through a competitive selection process that will identify projects that support recovery of public infrastructure damaged by Hurricanes Sally and/or Zeta.

Corresponding to the LRP, the program will focus on two primary activities eligible for CDBG-DR funds:

- Sewer and drainage improvements or construction
- Roadway improvements

Project criteria and selection process were defined in coordination with the municipalities during planning and the application for projects is expected to launch by February.

The submitted Activity Profile Form is for the full program and does not include individual projects. Projects will be reviewed and presented to the Commissioners for approval by Summer 2026. Baldwin County will consider projects at all stages of planning that can demonstrate completion no later than Q3 2028.

<b>Program Budget</b>	<b>\$13,371,303</b>
-----------------------	---------------------

<b>Applicants:</b>	Applicants may be any local municipality within Baldwin County (cities, towns, and utility districts), or tribal organization with an eligible infrastructure recovery need within the County.
--------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Eligible Costs:</b>	The awards to projects may pay for costs related to: <ul style="list-style-type: none"><li>• Design, Architectural, and Engineering</li><li>• Environmental review</li><li>• Acquisition</li><li>• Demolition</li><li>• Construction hard and soft costs</li></ul>
------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------
