## EXHIBIT A

### State of Alabama GOMESA Disbursement Justification

#### **Background:**

GOMESA was enacted by Congress in 2006 and significantly enhances outer Continental Shelf (OCS) oil and gas leasing activities and revenue sharing in the Gulf of America. Among other things, GOMESA provides for enhanced sharing of leasing revenues with Gulf producing states and the Land & Water Conservation Fund for Coastal Restoration projects. GOMESA authorizes uses of the proceeds for the following purposes:

- a. Projects and activities for the purposes of coastal protection, including conservation, coastal restoration, hurricane protection, and infrastructure directly affected by coastal wetland losses;
- b. Mitigation of damage to fish, wildlife, or natural resources;
- c. Implementation of a federally approved marine, coastal, or comprehensive conservation management plan;
- d. Mitigation of the impact of outer Continental Shelf activities through the funding of onshore infrastructure projects; and
- e. Planning assistance and the administrative costs of complying with GOMESA.

#### **Project Description:**

##### Perdido Bay Boardwalk and ADA Improvements – Baldwin County Commission

The population growth in Baldwin County has placed increasing demands for additional recreational opportunities and access to natural resources, highlighting the need for safe and accessible facilities for the public. Private development, particularly in southern Baldwin County, is reducing public waterfront availability, further intensifying the demand for secure, high-quality public parks along Perdido Bay and the Gulf of America. Many public parks that were previously established need capacity and accessibility upgrades to meet the current needs of both residents and visitors. The western side of Perdido Bay has limited public access to the shoreline, making Perdido Bay Park an ideal location for the public to experience the natural resources along Perdido Bay (Figure 1).

The Perdido Bay Park attracts many local visitors who enjoy the views and waterfront activities. However, the existing parking, boardwalk, and staircase need ADA enhancements and have deteriorated to a point where they are not adequate for public use (Figure 2). It is a goal of the Baldwin County Commission to protect and preserve our natural resources while providing improved public access. This project will provide fully accessible public access to natural resources, while minimizing ecological impacts of construction activities.

The Baldwin County Commission will contribute the funding for the Engineering & Design, Construction Services, and Grant Administration. The GOMESA funding will support the necessary infrastructure improvements to ensure full accessibility and usability for all visitors, including the construction of ADA accessible parking, sidewalks, boardwalks, gazebo, and viewing platform. To address current erosion issues and prevent future degradation, slope stabilization measures will be implemented across the property, particularly where the new boardwalk will be rebuilt. Additionally, lighting enhancements will be incorporated into the project ensuring year-round viability for use by visitors.

This project meets several GOMESA Authorized Uses including coastal protection and restoration, mitigation of damage to fish, wildlife, and natural resources, implementation of a federally approved marine, coastal, or comprehensive conservation management plan, and mitigation of the impact of outer Continental Shelf activities through the funding of an onshore infrastructure project. Upon completion, the boardwalk access improvements will mitigate impacts to natural resources caused by unmanaged access and user pressure due to currently limited access points. Such unmanaged access often results in adverse environmental impacts associated with increased sediment load from shoreline de-stabilization, rutting/soil compaction, and increased siltation of wetland habitats. The slope stabilization measures will reduce environmental impacts by reducing sediment transport and minimizing erosion into Perdido Bay. The Mobile Bay National Estuary Program's Comprehensive Conservation & Management Plan (CCMP) for Alabama's Estuaries & Coast 2019-2023 seeks to enhance public access to the water and natural landscapes under Ecosystem Restoration and Protection - 5 (ERP-5). In addition, the Alabama Coastal Area Management Program (ACAMP) is established in accordance with the Coastal Zone Management Act of 1972 and is intended to provide for the protection, restoration, and responsible development of the state's coastal area. Section 309(a)(3) of the ACAMP seeks to attain increased opportunities for public access to coastal areas of recreational, historical, aesthetic, ecological, or cultural value. This project will provide additional infrastructure to expand outdoor public recreational opportunities and conserve and enhance an important connection to Perdido Bay in a populated area of coastal Alabama where public access to the waterfront and natural resources is limited.

**Project Duration:**

This project is expected to take approximately thirty (30) months from the execution of the Agreement.

**Project Costs:**

Funding will be provided to the Grantee as one installment.

The first and final installment will be disbursed following submission of an invoice that includes (1) satisfactory evidence that Grantee is in compliance with insurance requirements set forth in Paragraph 20 of the Agreement; and (2) satisfactory verification that construction completion of project components can be achieved through available funding.

**Anticipated Costs:**

| <b>Installment</b>                        | <b>Category</b>  | <b>Estimated Cost</b> |
|---|--|-----------------------|
| 1   | Construction Costs Associated with Demolition, Site Prep, Sidewalk, Gazebo, Boardwalk, Parking, Viewing Platform, Shoreline Stabilization, and Lighting                | \$2,530,000           |
| <b>Total GOMESA Funding Not to Exceed</b> |  | <b>\$2,530,000</b>    |
|   |  |                       |
|   | Baldwin County Commission Contribution Engineering & Design, Construction Services, Administration, and such as amount necessary to achieve GOMESA project completion) | \$570,000             |
|   | Estimated Total Project Cost   | \$3,100,000           |

Category line items above are general descriptions of the type of activities anticipated to be necessary in order to achieve project completion. These categories may include itemized personnel time and/or contract services associated with project activities. In addition, the final costs of project activities may vary from the individual line-item estimates set forth above. However, funding shall in no event exceed the total amount of approved funding for Allowable Costs as set forth pursuant to the Grant Agreement. Grantee agrees and acknowledges that GOMESA funds cannot serve as a non-federal match for any other federal grant program.

**Nexus to Authorized Use:**

This project meets the criteria set forth in authorized uses: (a) Projects and activities for the purposes of coastal protection, including conservation, coastal restoration, hurricane protection, and infrastructure directly affected by coastal wetland losses; (b) Mitigation of damage to fish, wildlife, or natural resources; (c) Implementation of a federally approved marine, coastal, or comprehensive conservation management plan; and (d) Mitigation of the impact of outer Continental Shelf activities through the funding of onshore infrastructure projects.
