

**ARPA SLFRF WATER AND SEWER INFRASTRUCTURE FUNDING
REQUEST FOR PROJECT PROPOSALS (RPP)**

A. County Information

County: Baldwin County Commission

Contact: Mark Acreman

Mailing Address: P.O. Box 220
Silverhill AL, 36576

Telephone: 251-972-8557

Cell Phone: 251-269-7350

e-mail: mark.acreman@baldwincountyal.gov

B. Project Information

1. Project Name: County Road 65 Dirt Road Paving Project

2. Project Location: Foley (Baldwin County)

3. Will the County or a Subrecipient be the applicant for the project?

☒ County ☐ Subrecipient

If a Subrecipient is the applicant for the project, please provide the name and location of the subrecipient:

N/A

4. Please provide a brief project description including quantifiable information (i.e., length of water line, diameter, water tank capacity, etc.), whether it's an upgrade of existing facilities or a new project, and any other relevant information. (Please include additional sheets as necessary.)

The project will include approximately 1.52 miles of road paving and 16,000 feet of
stormwater drainage improvements. These improvements will provide better flow,
reducing up-stream flooding. They will also stabilize the road and ditches,
preventing erosion and downstream sedimentation.

5. Has any portion of the system related to the project been compromised, or has there been a situation where system users were without services (i.e. no water, no sewer services)?

☒ Yes ☐ No

If yes, please explain:

The existing dirt road has experienced numerous failures due to inadequate drainage and roadway washouts.

6. Is the project required through an enforcement action or violation (EPA, local health authority, etc.)? if yes please attach any letters, etc. from agencies.

☐ Yes ☒ No

If yes, please explain:

7. Please provide the status of the project. Have engineering plans been completed, are there any plans and specifications completed, permits obtained, and is there any anticipated schedule to implement the project?

Right of way acquisition is complete, Design plans are complete, Environmental permitting is complete.

C. Budget (please provide *if available*)

Category	Estimated Costs
Design/Engineering	
Construction w/ contingencies	\$ 970,150.54
Other (legal, admin, etc.)	
Equipment	
Land Acquisition	
TOTAL PROJECT COST	\$970,150.54

D. Sources of Funding

Category	Funding
ARPA SLFRF	\$ 754,920.21
Municipal/Agency funds	\$ 215,230.33
State Revolving Fund	
Other _____	
Other _____	
TOTAL SOURCES	\$970,150.54

Note: Projects with only ARPA funds, or ARPA and municipal/agency funds, may be easier to administer than projects with ARPA and other grant funds, as the other grant funds may impose additional requirements/regulations for the overall project.

E. Attachments (please provide *if available*)

- ☐ Engineering Report
- ☐ Any violation/enforcement actions
- ☒ Project location map

County Road 65 Dirt Road Paving Project

Project Overview:

This project is located on CR-65 near Foley Alabama. Numerous heavy rain events have occurred over the years causing roadway failures, ditch erosion, and loss of access to property.

The basin feeding this area contributes approximately 400 acres of drainage all concentrating along the roadside ditches on CR-65, before exiting to Magnolia River and eventually into Weeks Bay.

Due to the high flow velocities and erosion factors, the proposed improvements include paving the existing dirt road, stabilizing, and reinforcing open ditches with permanent ground cover, ditch checks and installing adequate cross drains.

What:

The project will include approximately 1.52 miles of road paving and 16,000 feet of stormwater drainage improvements. These improvements will provide better flow, reducing up-stream flooding. They will also stabilize the road and ditches, preventing erosion and downstream sedimentation.

Where:

The project is located on County Road 65 between County Road 24 (Underwood Road) and County Road 28 near Foley, AL. The attached site map shows a more specific location.

Why:

This project is needed to stabilize the existing dirt road and ditches that are currently experiencing erosion. This project will reduce sediment loss and greatly improve the water quality in the watershed.

Issues/Feasibility:

Baldwin County has acquired all the Right of Way needed to complete the project.

Environmental permits have been approved.

Cost Estimate:

Construction Estimate: \$970,150.54 (Materials only, see attached estimate)
Baldwin County will provide all Labor and Equipment at no cost to the project.

Project Schedule:

Construction: 5/1/24 – 11/1/24
