

Summerdale Fire Department
P.O. Box 148
Summerdale, Alabama 36580
989-6723

November 17, 2022

To whom it may concern,

Summerdale Volunteer Fire Department is seeking your help, if possible, with a hand-me-down used police vehicle. Our fire department recently restructured and replaced members of the department and we are now actively working on building a better fire department that can meet the needs of the community and provide the best service possible to our customers and neighbors.

Our fire department just hired its first paid employee to help facilitate building a better fire department. I was hired on as the Deputy Fire Chief/Fire Marshal/Emergency Manager. All other members of the fire department are volunteer firefighters.

We are facing struggles with building a new fire station, replacing outdated fire engines and support vehicles that are truly needed to help provide fire & emergency services in our jurisdiction.

Due to our budget situation, we have no other options but to ask for help via donations or your willingness to accept a small fee for any help you might be able to do for us.

We hope that your spare 2012 Chevy Tahoe might be available for us?? Please let us know what we can do to try and obtain this vehicle for use as a quick response emergency vehicle. (If at all possible, if this vehicle has any sirens, lights, or other equipment still on it, this will help us out. We understand that we would have to remove any blue lights before this vehicle could be placed in service and we will handle these costs.)

Very Respectfully,

Michael A. Aaron
Deputy Fire Chief
Summerdale Volunteer Fire Department
