Subject: FW: Water/Waste Water Management Course

Ron:
I received this a few moments ago and read the request for a letter of support.
It certainly does seem to be a course that would be beneficial to Baldwin and Mobile Counties. If you are of the same mindset and agree that this would be beneficial to Alabama's Coastal Counties; Would you please prepare a letter of support for the Commission's Consideration at the Work Session.
Thanks,
Frank

Subject: Water/Waste Water Management Course

A Message From

Good Morning,

Coastal Alabama Community College is reaching out to you for help. We presently are offering a Water/Waste Water prep program. We understand the demand for this program in our area and would like to continue to offer this program to you and those individuals that are interested in this field. We are presently working with Southwest Alabama Partnership Training and Employment (SWATE) to obtain approval to have this program WIOA approved. What does this mean to you? This means that those individuals who qualify based on financial or employment needs can receive this training paid for by WIOA. The cost would be nothing for the individual. How can this help you? If you presently have an employee who works for your company and is paid on the lower scale they could essentially qualify for WIOA and would be able to take course and there would be no out of pocket cost for you. Also, those individuals outside of this field that would be interested in going into Water/Wastewater could qualify for WIOA funding and receive the funding to take this course, obtain their certificate and then apply for a position with your company. What we need from the community is support in the form of a letter that we can put with our application. The letter would need to state the importance of this program to the community and the companies in our area. If you are willing to write a letter of support please reply and let me know. Thank you!

Thank you,

Tracie Ethington
