The MRF facility is anticipated to serve approximately 60,000 households in the collection area of Fairhope, Daphne, Foley and other areas within Baldwin County, Alabama. Collection from unincorporated areas and other smaller municipalities will be made possible by an anticipated 31 drop-off locations and curbside collection. Following collection, material will be transported to the proposed Magnolia Recycling Center where it will be sorted using a combination of automated and manual sorting through a single stream system process designed to operate at an initial capacity of 2.5 tons per hour with an ultimate capacity of 8 tons per hour.
